

Dr. Yuan is a research scientist in the Geographic Information Science and Technology group at ORNL. His research focuses on designing and developing computational and quantitative methods for interpreting and understanding large volumes of image and spatial data. He is currently leading projects on automatic object detection and characterization from remote sensing imagery on a world scale. He received PhD in Geodetic Science in 2012 and MS in Computer Science and Engineering in 2009, both at The Ohio State University. He worked as a research associate in the Perception and Neurodynamics Lab and the Mapping and GIS Lab.
